# EET - ELECTRONIC ENGINEERING TECHNOLOGY

## EET 111 DC Circuits (3-3-4)

Offered Spring and Summer Semesters

# Co-requisite: MAT 110

This course is a study of resistance, voltage, current, power and energy in series, parallel and series-parallel circuits using Ohm's Law, Kirchhoff's Laws and circuit theorems. Circuits are analyzed using mathematics and verified using electrical instruments.

## EET 112 AC Circuits (3-3-4)

Offered Summer and Fall Semesters

Prerequisites: EET 111 and MAT 110

This course is a study of capacitive and inductive reactance and impedance in series, parallel and series-parallel circuits. It also includes power, power-factors, resonance and transformers. Circuits are analyzed using mathematics and verified using electrical instruments.

## EET 131 Active Devices (3-3-4)

Offered Fall and Spring semesters

### Prerequisite: EET 112

This course is a study of semiconductor theory and principles, diodes and diode circuits, transistors, transistor circuits and other components. Circuits are modeled, constructed and tested.

## EET 141 Electronic Circuits (3-3-4)

Offered Spring and Summer Semesters Prerequisite: EET 131 This course is a study of electronic circuits using discrete and integrated devices, including analysis, construction, testing and troubleshooting.

## EET 145 Digital Circuits (3-3-4)

## Offered Fall and Spring Semesters

This course is a study of number systems, basic logic gates, Boolean algebra, logic optimization, flip-flops, counters and registers. Circuits are modeled, constructed and tested.

## EET 172 Electronic Drafting (1-3-2)

## Offered Fall and Spring Semesters

This course provides students with entry-level experience with drafting software used to create electronic schematics and wiring diagrams.

#### EET 227 Electrical Machinery (2-3-3)

#### Offered Fall and Spring Semesters

Prerequisite: EET 112 or PHY 202 or PHY 222 or Instructor Permission This course is a study of AC and DC electromechanical energy conversion devices, theory, applications and control. Devices are tested and verified using electrical instruments.

## EET 233 Control Systems (3-3-4)

*Offered Spring and Summer Semesters* Prerequisite: EET 227

This course is a study of open and closed-loop control system operations, elements and applications. Various industrial model programmable logic controllers are used to simulate application to flexible manufacturing systems.

### EET 235 Programmable Controllers (2-3-3)

*Offered Spring and Summer Semesters* Prerequisite: EET 233

This course is a study of relay logic, ladder diagrams, theory of operation and applications. Loading ladder diagrams, debugging and troubleshooting techniques are applied to programmable controllers.

## EET 243 Data Communications (2-3-3)

Offered Summer and Fall Semesters

Prerequisite: EET 145

This course is a study of the techniques for sending and receiving information. Topics include media characteristics, modulation and demodulation, signal conversions, multiplexing and de-multiplexing, protocols, industrial standards, networks and error detection and correction. Circuits are modeled, constructed and tested.

### EET 251 Microprocessor Fundamentals (3-3-4)

Offered Spring and Summer Semesters

## Prerequisite: EET 145

This course is a study of binary numbers; microprocessor operations, architecture, instruction sets and interfacing with operating systems; and applications in control, data acquisition, data reduction and analysis. Programs are written and tested.

## EET 273 Electronics Senior Project (0-3-1)

Offered Spring Semester

Prerequisite: EET 251 or Academic Program Director Permissions This course includes the construction and testing of an instructorapproved project. This is an opportunity for the student to do selfpaced independent research, design and construction of a project of the individual's choice. A written report is required.
