

EMPLOYMENT ASSISTANCE

Employment Assistance

Greenville Technical College's commitment to students does not end with graduation. Employment assistance (https://www.gvltec.edu/student_resources/career_services/employment-assistance.html) is available to help Greenville Tech graduates and currently enrolled students in their job searches. Assistance is given via Handshake (<https://gvltec.joinhandshake.com>). Here, students and graduates may upload their resumes and search for jobs posted by employers. Resume critiques and mock interviews are available by appointment. A computer lab and resources may be accessed during stated office hours. Other services include workshops, classroom presentations, and news of local job fairs.

Need help starting a resume or cover letter? SkillsFirst (<https://skillsfirst.com/organizations/gtc/>) allows students and alumni to create job search documents and submit them to CCPD for additional assistance.

Greenville Tech students and graduates are in demand by area employers, and the Center for Career & Professional Development helps to meet that demand every day. Students and graduates are encouraged to visit the CCPD and take advantage of the resources.
