

INSTRUCTIONAL COMPUTING

Tara Weekes (Tara.Weekes@gvltec.edu), Learning Resources Director
Carl Ingram (Carl.Ingram@gvltec.edu), Computer Lab Manager
Daryl Ham (Daryl.Ham@gvltec.edu), Digital Literacy

Instructional Computing assists students and faculty with the use of computer technology in learning and instruction. Computer labs are open to all students, faculty, and staff. Lab coordinators are available in each lab to help users prepare and print class assignments, access online courses, use Blackboard, conduct Internet research, and work with course-specific software and the college's portal.

We also offer Digital Literacy workshops that help students use information and communication resources to locate, evaluate, create, and share information, requiring both cognitive and technical skills. These workshops cover areas such as Blackboard usage and MLA/APA citations. To learn more, contact Daryl Ham (Daryl.Ham@gvltec.edu).

Also, please note that other college departments operate labs. For a full list of college computer labs, visit the open computer lab listing (https://www.gvltec.edu/student_resources/computer_labs/) .

Please note that Computer Lab hours and assistants vary during the summer and are subject to change. Other college departments also operate computer labs. For more information, visit the Instructional Computing (<http://gvltec.edu/computer-labs/>) website.
